

Iron Brigade Armory

May 2010

Dear IBA Customers,

In May we remember all of our military members and those that have served and made the ultimate sacrifice in the United States military on Memorial Day, at IBA you will never be forgotten. Please let us know if there is anything that you don't see on our site and need, we are always here to help. We would also like to remember all of our Sniper Moms on May 9 for Mother's Day. As always, please have a wonderful and safe month wherever you may be.

Sincerely,
Your Iron Brigade Armory Family

Combination Paint and MANOWAR Special

Choose from OD Green or Black Manowar Finish and complete the project with an IBA Camouflage Paint Job

See more on our proprietary Manowar Finish [Here](#)

See available paint schemes [Here](#)

Custom created Paint Schemes available upon request - please contact

Abby@ironbrigadearmory.com

Combo Price \$550.00
Total Savings \$125.00

GREETINGS FROM THE FOLKS AT IBA:

Will the person who is bored and has nothing to do, please call me. I will immediately take him off any mailing/email list and recommend a good internist for a complete physical. First of all, we are busy. Second, you should be busy. With this world changing, faster than can be mentioned even on FOX News, we better swing into high gear. I think we should re-focus on readiness of ourselves and family. Make real certain you have prepared yourself for what is coming. OK Chicken Little-what is coming? What is coming is the same thing I mentioned almost a year ago when I recommended you stock up on essentials-guns, bullets, food, medical supplies. The light bulb is glowing brighter each day in America as more and more folks wake up. This was evident at the Chantilly VA show this past weekend with a record crowd passing through the gates. Something like 20,000 folks attended! Many were selling collectible firearms at decent prices but most were buying supplies to complete or fluff up their inventories. Our tables are up front so we get to see a lot of what people have bought as they parade back up and out the front door. A LOT of ammo is being sold BUT price rules. Junk foreign stuff sells if it's cheap enough. Precision ammo and self defense handgun ammo is in very short supply. I think these types of munitions will remain scarce and pricey. Ammo cans were a sell out-especially the .50 cal cans. Folks are tired of basic home defense guns and are turning to a more precision type rifle-both AR platform and bolt action. The Remington M700 rules! It's the Harley Davidson of the gun world. Factory and aftermarket parts are available-options are numerous. This is, NOT SO with other brands-!!

We had a sell out on cleaning gear, bipods, slings and do-dads. Orders/rebuilds for Precision rifles are steady with great emphasis on upgrading existing customer owned rifles. Upgrades run from basic tune-ups to complete rebuilds. New scopes and mounts, BRM-S bipods with POD-LOCs, and refinishing the metal parts are the prime focus. All good work and can be achieved pretty quickly. I

Magazine Special

This month purchase 6 MagPul 20 rnd. Magazines for \$70.00! This price already includes shipping to the lower 48 states!

(AK and HI residents please inquire for additional shipping costs.)

This variant of the PMAG (Polymer MAGazine) is a lightweight 20-round 5.56x45 NATO, M-16 compatible magazine. It features a straight body with an advanced impact resistant polymer construction, a pop-off Impact Cover for storage, and an easy to disassemble design with a flared floorplate for positive magazine extraction from pouches. The PMAG 20 utilizes a resilient stainless steel spring for corrosion resistance and a controlled-tilt, self-lubricating follower for increased reliability. Made in U.S.A.

Features:

-Impact and crush resistant polymer construction

think the upgrades make a good rifle better and provide the owner with a durable weapon in a world that might require it.

Economically, the world is turning into a trash heap. The Greeks will default this summer[or sooner] and Portugal is out in front of that. What does that have to do with us, said '6 pack Charlie'? Well dumb butt, all that is tied to the EURO and the EURO is pegged to the dollar and the price of oil-so we have a major problem in the works. With the daily and exponential US debt climbing, almost on an hourly basis-we are doomed to something most folks would say is totally unacceptable. Serious inflation looms on our horizon. Is it too late to fix? Probably so but I'm not an expert. From what I saw yesterday with the summary interrogation of Goldman Sachs Bank-we haven't anyone in government with any integrity left. The 'hearings' were a sham. The timing was just right for the Dems to bring up the financial reform act and ram it through during a 'crisis'. Just another farce and a total waste of time. All that we need to do is QUIT SPENDING MONEY and balance the checkbook. Nero fiddled while Rome burned or so I heard.

The immigration and border crisis in Arizona is profoundly troubling and all the great State of Arizona is getting is grief, delays and non-support from the Federal Government, whose DUTY & RESPONSIBILITY it is to provide security for this nation. Standby to standby because we are in a dark hour for this Republic. If you want more details and facts, you should tune into Glenn Beck on FOXNEWS weekdays at 1700 hours. He'll pack your head with so much information, you'll need a notepad to help remember it all. Sarah Palin has been on the news consistently and has railed against all the devious antics of the liberal progressives-good for her. The other news channels continue to malign her at every turn. Where are the women's lib groups and their support of a multi-child Mom, former Governor of a State and notable American personage? Kind of a one sided lack of respect and also a failure of the liberal networks to report honestly. Are you surprised??

I trust our readership is doing well. As the saying went back in the olde days-'keep your powder dry'.

SEMPER FI,

Norm Chandler

President-Iron Brigade Armory

-Straight-bodied 20-round design maintains a low profile

-Controlled-tilt, self-lubricating follower for increased reliability

-Storage/dust cover

-Stainless steel spring for corrosion resistance

-Textured gripping surface
